Faculty of Technology (2021 - Present)

Taxila Central College
Horana

PROFILE

I'm a passionate and self-motivated UI/UX designer with a keen eye for creating user-centered, intuitive designs. Skilled in crafting interactive prototypes, wireframes, and user flows using tools like Figma and Adobe XD, I am committed to delivering innovative solutions that align with user needs and business goals. As an enthusiastic team player and adaptable undergraduate in Information and Communication Technology, I am eager to learn, grow, and contribute meaningfully through an internship opportunity.

PROJECTS

1. Weather App Design - Mobile Application [Individual]
I redesigned the Redmi 10 weather app using Figma with animations, plugins, and prototyping for an attractive UI/UX. **(FigmaLink)**

2. Job Finding App Design - Mobile Application [Individual]
Name: "JobNet", Figma, Adding and Creating Annimations, Prototyping. **(FigmaLink)**

3. Juice Bar Web Design - Web Application [Individual]
This UI/UX design, made in Figma, uses prototypes, plugins, and background remover tools. It lists juice types and the location but is not for online orders. Images are from Pinterest. **(FigmaLink)**

4. Rice and Spices Delivery E-Commerce Web Design - Web   Application [Individual]
Name: "Gamage Mills Heaven", This UI design, created in Figma, is part of my E-Commerce Web Application project. It focuses on a clean, user-friendly layout, balancing functionality, aesthetics, and simplicity. The final website closely matches the design, showcasing my creativity and practical skills. **(FigmaLink)**

5. Simple SignIn Page - Mobile Application [Individual]
I wanted to create a simple sign-in page using Figma with a bouncy animation. I used prototyping to achieve this **(FigmaLink)**

6. Furniture Selling E-Commerce Web Design - Web Application [Individual]
I designed a furniture shop UI in Figma, used background remover tools, and included discount rates in the design. **(FigmaLink)**

7. Trouser Selling Platform E-Commerce Web Design - Web Application [Individual]
I designed a web app to sell trousers, focusing on UI. It features denim for men and women, size selection, and styled displays. I used background removal tools for images **(FigmaLink)**

8. Rice and Spices Delivery Database Management System [Individual]
Name: "Gamage Mill's Heaven", Used HTML, CSS, Javascript, PHP, MySQL
Software Engineering Project with SRS Document and Project Proposal **(GitHub)**

9. Calculator [Individual]
I used HTML, CSS, JavaScript **(GitHub)**

10. My Portfolio
I used HTML, CSS, JavaScript **(GitHub)**
